

MY ENDIA STUDY VISIT BOOK

NAME: _____

***I AM A
RESEARCH
SUPERHERO!***

I AM HELPING TO FIND THE CAUSE OF TYPE 1 DIABETES

THIS IS ME

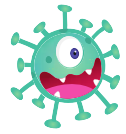

Draw a picture of you or
stick a photo of you here!

AT MY ENDIA VISIT, I CAN GIVE SOME SAMPLES AND GET SOME STICKERS OR STAMPS!

WHY DOES ENDIA COLLECT MY POOP?

To see what your body does with the food you eat and fluids you drink. We also test for microscopic living creatures that harmlessly live in the body, like viruses, and bacteria!

WHY DOES ENDIA COLLECT MY WEE?

To see what your body does with food and drinks.

WHY DOES ENDIA COLLECT SWABS?

ENDIA looks at the microscopic creatures that live in and on your tongue, cheek, throat, nose and skin. These include every day viruses and bacteria that are harmless and live normally on everyone!

WHY DOES ENDIA TAKE MY BLOOD?

There is soooooo much information in your blood! It tells us about how your body fights disease, what your body does with food and drink, vitamins, blood sugar, and hormones that control how your body works.

ENDIA ALSO COLLECTS ONE OF YOUR TEETH

After one of your teeth naturally falls out, our tooth fairy scientist takes your tooth to our lab because it has layers of information about your growth and development right back to when you were in your mummy's tummy!
